Testing procedure & pitfalls from the user perspective

What else should we look out for?

Communication channels

- ▶ If you encounter an issue while trying to download data, please post it on the **EIDA issue tracker**:
<https://github.com/EIDA/userfeedback/issues>
- ▶ From the data center provider perspective: How to communicate to the users what are the best practices? User guides/documentation?
- ▶ Who is interested in helping out with testing? Who is interested in the test results?
